-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's submission of the International Search Report for PCT/DK08/00478. The references cited in that International Search Report have been considered.

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 3761

- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the following limitations:

- "the outer contours" in lines 5 and 22
- "the periphery" in line 24

There is insufficient antecedent basis for these limitations in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 2 and 4 – 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Cawood (US 4,449,971).

Art Unit: 3761

With respect to claim 1, Cawood discloses a collecting bag comprising a bag member formed by two film blanks (11a, 11b) with joined edges defining the outer contours of the bag member (figures 1 – 3), an inlet opening provided in one of said film blanks (29), connecting elements surrounding the inlet (31, 13), a discharge portion at a distance from the inlet opening comprising a discharge opening (34), a closure device at the discharge portion (35b) and accommodating means (26) comprising at least one open receptacle formed in the bag member within the outer contours and has a basis portion (27) in which the film blanks are undetachably connected to each other, and that the periphery of the basis portion is situated at a distance from the joined edges of the bag member and the discharge portion as set forth in figure 1.

As to claim 2, Cawood discloses a collecting bag characterized in that the film blanks are connected to each other by means of a heat-sealed joint extending along the periphery of the basis portion as set forth in col. 3, lines 1 – 4.

Regarding claim 4, Cawood discloses a collecting bag characterized in that the accommodating means comprises a retaining means (space within 26) as set forth in figure 3.

With respect to claim 5, Cawood discloses a collecting bag characterized in that the retaining means comprises a strip (12) having at least one engagement section as set forth in col. 3, lines 15 – 20.

With reference to claim 6, Cawood discloses a connecting bag characterized in that the basis portion has cross-sectional dimensions corresponding to the dimensions of the closure device as set forth in figure 2.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cawood (US 4,449,971).

The difference between Cawood and claim 3 is the provision that the film blanks are connected to each other by gluing.

It would have been obvious to one of ordinary skill in the art to connect the film blanks to each other by gluing because Cawood discloses the connection of the film blanks through heat sealing and the substitution of one method of adhesion for another is within the level of ordinary skill in the art.
